

YBA

PRODUCT INFORMATION

PASSION A650 POWER AMPLIFIER

YBA Passion 650 never hides its origins. It's a music lover's amplifier that clearly translates Yves-Bernard André's vision and passion.

The 650 has more than enough potency in its design to translate music with power, dynamics, natural transparency and most important, correct timbre and musical imprint.

Passion needs no second guesses. Seamless integration of technology in the service of music is evident even after those first few musical notes.

Within its price range Passion 650 offers one of the most complete power amplifier packages that bring not only great sound, but standout aesthetics. In this day and age YBA offers great value and pleasure for both the ears and the eyes! There are eye catching details like the power output meter on the front panel and the heatsinks on either side shaped into the company name.

The power amplifier rests on three feet; one in front, two in the back, which is synonymous with YBA. The mains power switch is hidden from sight on the bottom panel, towards the front edge. The backlight brightness is adjustable in four steps from the remote control unit, and can also be switched off altogether. The amplifier's rear panel includes two pairs of gold plated speaker outputs – speaker A has the higher quality sound. It has stereo RCA and balanced inputs plus a mono balanced input if it is to be used in bridged mono mode.

SPECIFICATIONS

Audio Outputs
Power Outputs

2 Pairs Speaker Outputs
Stereo 200W @ 8 Ohms per channel
Stereo 400W @ 4 Ohms per channel
Mono 600W @ 8 Ohms bridged

SNR
Frequency Response
THD+N (20Hz - 20kHz)
Inputs

>95dB
20Hz - 20kHz (-0.5dB)
<0.1%
1 RCA, 1 Balanced Input (Stereo)
1 Balanced Input (Mono)

Power Supply

Linear power supply with high performance UI-Core transformer 1000VA

Finish
Dimensions (w x d x h)
Weight

Natural aluminium
430mm x 397mm x 178mm
25 kg
